

GTreasury's Andrew Blair and Mike Zack Team Up with Colleagues from Toyota and SWIFT to Speak on ISO 20222 and Treasury Management Systems at TEXPO 2017

Expert Presentations on the Full Capabilities of a Robust TMS and on the Benefits of the ISO 20222 Financial Messaging Framework for Domestic and International Treasury Operations

LAKE ZURICH, IL – (March 30, 2017) Treasury teams around the globe are looking for ways to automate their processes, reduce costs, and enable their professional staffs to devote more time to strategic tasks. Two presentations, co-hosted by GTreasury executives at the [2017 TEXPO \(Booth 111\)](#) at the JW Hilton in Austin, TX, April 2-4, will demonstrate ample ways to do just that and much more.

Andrew Blair, Account Manager at [GTreasury](#), along with [Toyota Industries' Commercial Finance](#) Treasury Manager **Alan Smith** and Senior Treasury Analyst **Akshat Patel** will present "[Efficiency and Effectiveness: The Ease of Using a Robust TMS](#)" on Monday, April 3 at 4:00 p.m.

Those who attend this session will hear examples and case studies of comprehensive TMS functionality such as: cash management, accounting, banking, payments, debt and investments, forecasting, and other sophisticated endeavors. Session attendees will also learn how their TMS can collaborate with departments outside of treasury to send payments, to integrate with a back office system, and to improve controls through a centralized TMS platform

Mike Zack, Senior Treasury Consultant at GTreasury, and [Andrew Hazen](#), Regional Director of the Society for Worldwide Interbank Financial Telecommunication ([SWIFT](#)) will co-host "[I So Want to Know About ISO 20222](#)" on Tuesday, April 4 at 3:30 p.m.

Attendees at this session will get fully up to speed on ISO20022, the universal financial industry messaging standard. They will learn what ISO20222 is and what current market initiatives are adopting it, both domestically and internationally. They will also hear practical case studies of corporations using ISO 20022 in payments and treasury, and how ISO can bring significant savings through higher STP rates and faster customer onboarding.

Those who are unable to attend the conference and wish to learn more about GTreasury solutions may [click here for more information](#).

About GTreasury

Originated in 1986, GTreasury is the global leader of treasury management solutions for organizations spanning the world. GTreasury's solution illuminates a treasury's liquidity by centralizing all incoming and outgoing banking activities, along with tracking all financial instrument activities. This gives GTreasury practitioners real-time insight and access into their global liquidity. GTreasury is the only company that offers both an installed and a SaaS solution. Our modular platform and infrastructure allow any size treasury operation the ability to customize a solution that is best suited to their needs.
